SUMMARY

Data Analytics and Computer Science student at James Madison University with hands-on experience building interactive dashboards in Excel and Tableau, querying and transforming large datasets with SQL, and applying ETL concepts and EDA across independent projects. Built an end-to-end NBA player and team analytics platform using SQL, Power BI, and R, including a custom statistical scoring engine and a published GitHub repository. Experienced evaluating AI/LLM outputs professionally through the Handshake AI Research Program. Actively seeking a data analyst internship where I can apply technical skills to real business problems.

EDUCATION

- **James Madison University** — Sophomore (Computer Science | Data Analytics) – 3.17 GPA
 - *Relevant Coursework:* Introduction to Data, Applied Statistics Using R, Algorithms & Data Structures, Discrete Structures, Calculus I

PROJECTS

- **NBA Player & Team Analytics Dashboard | PostgreSQL, Excel, Power BI, R, PowerPoint** | <https://github.com/vledwardsjr/NBA-Analytics-Project> | **June 2026**
 - Designed a normalized PostgreSQL database covering 6 NBA seasons of player and team statistics, with all scoring logic built in SQL
 - Built a percentile-based composite scoring system for player/team performance; diagnosed and fixed a critical formula flaw
 - Developed a custom award framework (MVP, DPOY, OPOY + 5 fictional awards); cut 4 categories after identifying small-sample bias
 - Delivered 7 Power BI dashboards, an R methodology report, and a stakeholder deck; published complete project to GitHub
- **NYC Jobs Market Analysis Dashboard | Excel** | <https://github.com/vledwardsjr/nyc-jobs-excel-dashboard> | **February 2026**
 - Designed an interactive data dashboard in Excel using Power Query and PivotTables to analyze job market trends
 - Performed data cleaning and transformation on datasets with 1,000+ records
 - Conducted exploratory data analysis across multiple variables to identify salary and hiring trends
 - Created dynamic visualizations to communicate insights and support data-driven decision making
- **Job Salary Analytics | SQL & Excel** | <https://github.com/vledwardsjr/JobSalaryAnalytics> | **December 2025**
 - Cleaned and analyzed 1,000+ job postings using SQL and Excel to compare salary trends between DMV and non-DMV data markets
 - Wrote SQL queries to rank top-paying roles and identify in-demand technical skills, surfacing skill combinations tied to higher pay
 - Used Excel for data validation and exploratory analysis, uncovering measurable regional salary gaps and skill-specialization patterns

SKILLS

- **Programming & Data Tools:** Python (pandas, data manipulation, scripting) | SQL (window functions, CTEs, layered view architecture, relational database design) | Excel (PivotTables, Power Query, advanced formulas, data cleaning) | Tableau (dashboards, data visualization) | Power BI (dashboard development, DAX), R (R Markdown, data analysis, technical reporting)
- **Data Analytics & Methods:** Data Cleaning & Transformation (ETL concepts) | Exploratory Data Analysis (EDA) | Data Visualization & Dashboarding | KPI Development & Performance Metrics | Statistical Analysis (basic regression, distributions) | Data Modeling (Dimensional/Relational Modeling)
- **Other Tools:** Git & GitHub (version control) | Relational Database Design | Data Entry & Validation | POS & Inventory Systems
- **Core Competencies:** Analytical Thinking & Problem Solving | Data Interpretation & Communication | Attention to Detail | Cross-Functional Collaboration

CERTIFICATIONS

- IBM Intro to Data Analytics (2025) | Excel for Data Analytics (2025) | SQL for Data Analytics (2025) | SQL+ for Data Analytics (2026) | Power BI for Data Analytics (2026) | CompTIA IT Fundamentals (ITF+) | IC3 GS6 Level 1 & Level 2
- *Global Career Accelerator* — Data Analysis (Excel) (Mar 2026) | Data Visualization (Tableau) (May 2026) | AI Professional Skills (May 2026) | Intercultural Skills (May 2026)

WORK/LEADERSHIP EXPERIENCE

- **Volunteer Work at the Resourceful Women's Thrift Store (2021 - August 2025)**
 - Supported inventory organization and donation tracking to improve operational efficiency
- **Fit Right Kid's Shoes Inventory Specialist (September 2022 - August 2024)**
 - Managed and tracked inventory data across 100+ items using POS systems
 - Ensured data accuracy through validation and consistent data entry processes
 - Supported inventory analytics by organizing and updating product records
- **Fit Right Kid's Shoes Front Desk & Customer Data Specialist (November 2024 - January 2026)**
 - Maintained and validated customer data using POS and scheduling systems
 - Ensured data accuracy and consistency for operational efficiency
 - Collaborated with team members to improve data reliability in scheduling workflows
- **Bridgly (Early-Stage Startup) — Co-Founder & Operations Lead**
 - Led data validation and organization of operational datasets to ensure accuracy and usability
 - Coordinated workflows and managed data processes to support platform functionality
 - Contributed to early-stage data structuring and process optimization
- **Handshake AI Research Program — AI Trainer (February 2025 - May 2026)**
 - Evaluated large language model outputs using structured evaluation frameworks to assess accuracy and reasoning quality
 - Analyzed response patterns across multiple prompts to identify inconsistencies and improve model performance
 - Applied analytical thinking and attention to detail in high-volume evaluation workflows
